PROJECTS

Spicy Management System

- The Spicy Management System is a web-based platform that simplifies the management and promotion of Lankan Flavor Spicy Company's products. It offers modules for inventory, production, sales, vendors, and financial analysis. With a focus on targeted advertising, the system enables efficient campaign creation, monitoring, and customer engagement. This comprehensive solution enhances operations, optimizes advertising, and boosts customer satisfaction in the competitive spice market.
- React | Express | NodeJS | MongoDB | Firebase | Stream Chat API
